When Mrs. Lombard offered to recommend Miss Simpson to her friends as a dressmaker she was honest in her wish to help the little woman, but her efforts bore more evidence of honesty than of tact.

"I wish you would try Dora Simpon," she said earnestly to three of her friends who were calling upon her one day. "She's such a good little body and so unfortunate! Her old customers have dropped off one by one till there's scarcely a person in the neighborhood who employs her now.

"As I often say to my husband," continued Mrs. Lombard, with haste, as she saw signs of inquiry on the faces of her friends, "suppose she doesn't fit very well. That doesn't alter the fact that she has an invalid brother to support and that she tried everything else. from stenography to cooking, and only took up sewing as a last resort and just hates every stitch she takes and always has. Now, do try her, some of you. She's been with me for the last four days making a jacket for my Jim. Dora is just as patient about it as can be, though we've had it all to pieces three times."-Youth's Companion.

The choir will be robed in new vestments, which represent the generosity of many friends of St. George's. Following is the order of services:

Paris with an escutcheon in the shape of a corset and an open pair of scissors in the middle painted on the panel of each door. That was Rhomberg's coat of arms, and it told its own tale. He was a genius in his way and owed his success chiefly to his skill in disguissuccess chiefly to his skill in disguising slight deformities and bringing out the most attractive charms of his fair customers. He rapidly made a fortune and left his heirs an annual income of 50,000 francs. Under the first empire and the restoration Leroy supplied the dresses of the ladies of the court and the higher nobility from his splendid mansion in the Rue Richelieu. An effusive encomium was written upon him by Auger, a member of the acad-

A peculiarity of fulminate of mercury is that it produces a shock to which all other substances are sensitive, and its supreme value as an explosive rests in this fact and in the known liability of all explosives to be detonated by more or less distant explosions. Why They Left. A comedian appeared in a four act comedy in a western mining town, according to the Buffalo Commercial. At the end of the third act the miners rose in a body, gathered up their belongings and started to depart. The comedian, in dismay, rushed before the curtain. "Gentlemen," he said, "there is another act yet." "Yes; that's why we are going," said the miners.

#### TO HAIR DRESSERS

A Splendid Hair Tonic that Makes Beautiful Hair

Every hair dresser should know about Parisian Sage, the quick acting hair dressing, that does just what this paper tells you it will do. Parisian Sage is a most delightful and different hair dressing, a fact that will be recognized the moment it is applied to the scalp. There is not a particle of stickiness in it; it is not greasy; it has a delicate and refined odor, and is a truly invigorating tonic that will make hair grow, if the hair root still shows the least sign of life.

Try a bottle of Parisian Sage. It will brighten up the hair in two days.

Parisian Sage is guaranteed by Leverty & Bro. to cure dandruff, stop falling hair and scale. Itsh in two weeks. ing hair and scalp itch in two weeks, or money back. It is particularly in demand by women of refinement, who desire soft, luxuriant hair, that compels admiration. Price 50 cents a large bottle by Loverty & Bro., or direct, all charges prepaid, from the American makers, the Giroux Mfg. Co., Buffalo, N. Y.

Even though it takes pork four hours to leave the stomach and six more to be dissolved and absorbed in the small intestine, what does that matter so long as it is completely assimilated by the end of that time, as it is in 90 per cent of all digestive canals? It is the slowest, but one of the surest foods that we have to give of all its energy to the body. Its very slowness is what gives it its splendid staying powers for hard work, whether muscular or mental. As a matter of fact I have seen more cases of dyspepsia cured by the use of breakfast bacon than by any kind of drug or restricted diet. An adult alimentary canal which cannot digest bacon or ham is not to be regarded as healthy, and, instead of humoring and giving in to a weak digestion, it should be braced up and, under skilled supervision, educated to take what is given it and make no fuss. Stomachs can be spoiled by giving them too little to do almost as easily as by giving them too much. A healthy stomach fit to cope with the emergencies of life must be able to digest not only that which is digestible, but much that is difficult of digestion, and this is the standard which should be aimed at in dietetic therapeutics.—Woods Hutchnson, M. D., in McClure's Magazine.

Got a Cheap Dinner. Verily the duchy of Baden possess a Solomon in the person of one of her magistrates. He is the burgomaster of a village in a street whereof a cvclist ran over and killed a goose. The owner of the bird demanded 3 marks damages. The cyclist thought 2 ample. The case came before the chief magistrate, who gave his judgment as follows: "The plaintiff declares that if paid 3 marks he will make no claim for the dead goose. The defendant, who is wiffing to pay 2 marks, also makes no claim for the body of the goose. Defendant, hand me 2 marks. and you, plaintiff, hand me the goose." When both had obey d his commands he produced 1 mark out of his pocket and handed all three to the plaintiff. The goose he kept for himself and doubtless ate it with the good digestion which comes from the knowledge of having pleased everybody.

Arnenie, Arsenic has been known from very early times as a deadly poison. It is believed to have been the means employed by Nero to remove his enemies, and there is little doubt that it was also known to and employed by Messalina and Agrippina. During the middle ages it was extensively used as a secret poison, being sold by alchemists and poisoners of Italy under the name of "widow's powders" or "succession powders." Its properties were definitely ascertained and made public by Brandt in 1733. The plant from which asafetida is produced is a native of Persia, Afghanistan and northern India. In all these countries the inhabitants use it as a seasoning for their meat and vegetables, much as red pepper is employed by the natives of Mexico and South American states. The odor is not deemed by them in the least offensive.

It is a peculiar fact that very few men, even accomplished shots, know how a revolver ought to be handled. Nearly all are taught to handle a revolver as if it were a rifle—that is, by bringing the object aimed at and the fore and hind sight into a line. This is all well enough for shooting gallery and when it is decomposed along with back, much better results are obtaincharcoal an immense beat is developed, able in this way.

A Missouri judge tells how he quieted a barber who had a lotion for sale. A freight steamer once came into The barber had just shaved him and so expensive I cannot afford it." For the Land's Sake The farmer was fertilizing his soil. A lady from the city stopped to gaze

"What on earth is that?" she asked. "A new fertilizer, ma'am." "For the land sake!" she cried. "Yes, ma'am." said the farmer.

Not Worth While, "Perhaps if I were to boll it down," suggested the space writer. "Wouldn't do any good," said the obdurate editor. "Take a gallon of water and boll it down to a pint, and it would still be nothing but water."

It may prove valuable information to know that alcohol is the antidote of carbolic acid and how to use it. If the burn is external pour alcohol over it; if internal, swallow whisky.

The store-sales to-day that are uninfluenced, directly or indirect The store-sales to-day that are uninfluenced, directly or indirectly, by store-advertising will not have amounted to ten per cent, of the total business of the day. By the direct influence of advertising is meant the sales of articles specifically advertised. By the indirect inluence of advertising is meant the articles sold that are not specifically advertised, but are displayed to the customers who are drawn to the store BY THE ADVERTISED ARTICLES. In the latter case, as surely as in the first, the advertising must be credited with the sale.
